

Bharat Fuel[™]

TRINETRA

Petroleum Pvt. Ltd.

Our Vision

Our vision is to become a key player in Bulk LPG (Packed Cylinder and ALDS) market in India through a chain of "TPPL Blending plant Franchisee's at strategic locations across the country. We intend to bring value and cost benefit to our customers through blending propane and butane in the right mix to deliver a quality product to the end users. Our vision is to be among the top players in our business by delivering superior customer service with a focus on quality, safety and environmental standards.

What is LPG, LPG blending and bottling plant?

LPG is extracted from heated crude oil using distillation tower. This LPG can be used as is or separated into TPPL products in three primary parts viz, propane, butane and isobutene. LPG is stored pressurised as a liquid in either cylinders or tanks which are known as Bullets because of its shape.

However, LPG can also be produced by blending propane and butane in a TPPL blending plant which is often cost effective. Bharat Fuel is in the process of creating a chain of "Franchisee's across the country for Bharat Fuel blending at strategic locations thus giving it a price advantage over existing TPPL marketing players.

Project in Pipeline:

We are currently working on three new bottling & blending facilities on various locations of north India to capture the market potential, first in Firozabad (Uttar Pradesh), second at Varanasi (Eastern Uttar Pradesh) and third in Bhilwara (Rajasthan). It is estimated that these units will be in production till starting of 2020. After completion of this project we will become the first private player in northern India which has the largest storage and bottling facilities in northern, west & north east India.

Domestic Bharat Fuel:

Bharat Fuel is very friendly to the housewife if used in the safe and specified manner. Bharat Fuel installation for a household consists of ISI approved Gas Stove, Regulator and Suraksha hose, Bharat Fuel offers immediate and hassle-free gas connection right at your door step. At the comfort of your home or office, you can avail a new domestic gas connection with minimum documentation. We welcome you to experience the world-class services of Bharat Fuel. We provide various sizes of cylinders as per needs of consumer for domestic use, usually we have a wide range of 6Kg, 12 Kg & 15 Kg cylinder for domestic user.

Commercial Bharat Fuel:

We specialize in installing TPPL equipment and supplying LPG to a variety of commercial customers including hotels, restaurants, agriculture, cutting, welding, caterers, resorts, sweets shops and other institutions such as Hospital and Hotel businesses choose Bharat Fuel because of its product quality and service. We provide various sizes of cylinders as per needs of consumer for commercial use, usually we have a wide range of 17kg, 21Kg & 33kg cylinder for commercial user.

Industrial Bharat Fuel:

We have both VOT/LOT for industrial propose. Liquid Off-take (LOT) TPPL systems have become popular in commercial & Industrial usage of TPPL. The system offers Strength of Bulk TPPL Installation and easy functionality as that of Cylinder manifold. LOT LPS System withdraws liquid TPPC using the LOT valves. The LOT System can cater to volumes upto 250kg per Hour also occupies less space. They are easy to handle & provide with High Safety standards (LOTs fixed with SRV/EFCV within the Cylinders) the LOT LPS system are highly cost effective as there is no residual loss. We provide easy availability wide range of 33Kg & 47Kg cylinder for Industrial Use.

About Bharat Fuel

Bharat Fuel brand owned by Trinetra Petroleum Private Limited. The promoters are having an industry experience of 10 years. Bharat fuel focused into creating a chain of TPPL blending Plant.
